NEW
PRODUCT

CHANNEL LIFTERS

MODEL: P110C04DC3
 MAXIMUM LOAD CAPACITY:
 600 LBS (270 KG)

MODEL:
 MRTALPCH610CDC3
 MAXIMUM LOAD CAPACITY:
 900 LBS (410 KG)

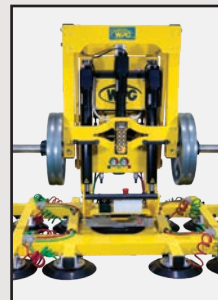

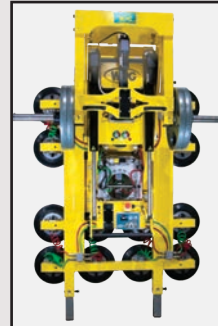

WPG makes in-line lifters with specially designed concave vacuum pads for handling curved surfaces. The unique shape of these pads allows their edges to flex and shift while keeping a firm seal. P1 and MRTALPCH models are ideal for most residential windows.

MANUAL ROTATOR/ POWER TILTER

MODEL: MRPT209CDC3S
 MAXIMUM LOAD CAPACITY:
 2000 LBS (905 KG)

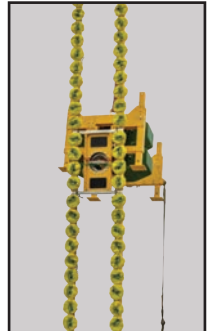

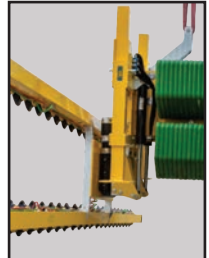

For wider and heavier pieces of curved glass, we have several lifter options featuring vacuum pads with pivoting mounts that conform to the glass curvature. These lifters, including the MRPT209CDC3, are ideal for projects in city centers and on specialized buildings.

POWER ROTATOR/ TILTER

MODEL: PRT489CDC3S
 MAXIMUM LOAD CAPACITY:
 5300 LBS (2400 KG)

WPG's largest-capacity lifter for curved glass employs a manipulating head and a separate actuator for moving the pad frame by remote control as needed. The integrated counter-balancer allows the user to offset the load for the optimal hang angle when positioning under eaves. The pad frame also adjusts to match the load length.
